

Ballistic Desk

The **Ballistic Desk** armored 'Desk Top' panels can be fastened to either an existing desk or can be newly manufactured as the top of a traditional desk. Each panel has a smooth surface to support normal student curricular activities. The desks can be placed strategically around the classroom. They are designed to be lightweight for ease of movement while providing up to NIJ Level III Ballistic protection.

The Ballistic Desk armored panels are manufactured utilizing a proprietary blend of lightweight ballistic Kevlar and Dynemna/Spectra material. They are designed to be lightweight with non-slip handles for ease of movement. The Ballistic desk armored 'Desk Top' panels can be manufactured to any size specification and are installed with a desktop quick release system.

Utilizing the desk top quick release system, the Ballistic Desk armored 'Desk Top' panel can be released from the desk in less than 4 seconds. Carry handles are strategically located on the back of each panel to allow for ease of use while in a stationary position or moving to a safe location.
