

# The PAK-Jacket™ System

The PAK Jacket™ (Protect A Kid Jacket) System is designed for individual mobile protection. Manufactured to NIJ-III A ballistic standards, the PAK Jacket™ System provides protection from .22, .38, .44, and 9mm ballistic rounds. In addition, the jackets are fire retardant, cut resistant, razor/slash resistant, bite resistant, and shrapnel resistant. As part of a total system, each PAK Jacket™ includes Kevlar gloves, shatter resistant goggles, a vacuum sealed first aid kit, and a high decibel whistle. The PAK Jacket™ System is a versatile option for protection from a variety of emergency or threat situations.

**SPECIFICATIONS**—The PAK-Jacket has been designed to protect the body, genitals, arms, neck, and head from a variety of injuries that may be caused during a natural disaster, emergency or threat situation. The outer shell of the PAK-Jacket is made of a proprietary Kevlar weave and includes ballistic plates covering the torso area of the jacket manufactured to NIJ-III A standards. Even with the amount of protection offered, the PAK Jacket remains light enough so an adult or child can move freely to a safe area. The interior lining is also fire resistant and static resistant.

## FEATURES

**First Aid Kit**—A vacuum sealed first aid kit is attached to the interior of each jacket and allows first responders to administer immediate first aid when required. Each kit comes with pressure bandages, tourniquet, and a waterproof first aid directional card.

**Gloves**—A pair of special Kevlar weaved gloves are stored in the hood of each jacket. These gloves offer cut proof protection when used to move sharp or jagged debris. Kevlar weave mittens will be stored in the hood of children's jackets.

**Goggles**—Goggles are stored in the hood of each jacket. The goggles are specially designed to provide protection in extreme temperatures and seals to almost any face shape. They meet ANSI Z87.1-2003 (High Impact) Standards and are certified to the requirements of CSA Z94.3.

**Whistle**—A high decibel safety whistle comes with each PAK-Jacket and is stored in the jacket sleeve pocket. The whistle can be utilized to assist rescue workers locate a person who may be trapped under debris or in a smoke filled building.

**Fire Escape Respirator (Optional)**—An ASE 30 Fire Escape Respirator and Smoke Hood can be added to each PAK-Jacket.
